SPAIN – THE STATE OF THE ART

Spain is a land of breathtaking landscapes, colorful history and a deep, complex culture in which wine has long played an important role. Geography and climate together play a fundamental role in defining Spain's many wine styles. In the past few decades, Spain's wine industry has engaged in a great deal of modernization, with traditional practices and equipment giving way to state-of-the-art technologies. The result has been a significant improvement in quality and reliability. Wine production in Spain dates from more than 2000 years ago and it acquired a major development during the Roman Empire, when it was exported to Italy to delight the Empire Leaders who were aware of its remarkable quality.

SPANISH WINE TERMS

Crianza

A wine labeled crianza has spent one year in oak barrels.

Reserva

A wine that says reserva on the bottle has been aged for two years; one of these years has to have been spent in oak.

Gran Reserva

These wines are aged for two years in oak and three years in the bottle.

Denominación de Origen (D.O.)

Many wine regions in Spain are registered as a "denominación de origen", which means they are protected by European laws.
